<b>Office Action Summary</b>	<b>Application No.</b> 10/520,117	<b>Applicant(s)</b> NAMMENSMA ET AL.	
	<b>Examiner</b> Tony Chuo	<b>Art Unit</b> 1795	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 30 December 2009.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Response to Amendment***

1. Claims 11-15 and 21-24 are currently pending. Claims 1-10 and 16-20 are cancelled. New claims 21-24 have been added. The previous objection to the drawings is withdrawn. The previous objection to the specification is withdrawn. The previous 112 rejection of claims 11-16 is withdrawn. The certified English translation of the Netherlands priority application no. 1020985 is sufficient to overcome the Sarkar and Mardilovich references. However, upon further consideration, claims 21-24 are rejected under the following new 112 rejection. This action is made FINAL as necessitated by the amendment.

### ***Specification***

2. The disclosure is objected to because of the following informalities: the heading "DESCRIPTION OF THE PREFERRED EMOBIMENTS" is misspelled. Appropriate correction is required.

### ***Claim Objections***

3. Claim 23 is objected to because of the following informalities: the word "the" in line 2 is repeated and should be deleted. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 21-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "a second porous layer with a sintered thickness of 10 to 20  $\mu\text{m}$  and a porosity of at most 40%" is not supported by the specification. The specification discloses on page 4, "The porosity of layer 6 is preferably 40%". Layer 6 is disclosed as the first porous layer, not the second porous layer.

***Allowable Subject Matter***

6. Claims 11-15 are allowed. Claims 21-24 would be allowable if the 112, 1<sup>st</sup> paragraph rejection is obviated.

The Donelson reference discloses a fuel cell comprising: a sheet "40" (anode support), an anode "18" on a first side of the anode support, an electrolyte layer "20", and a cathode layer "22", wherein a stress compensation layer provided on a second side of the sheet "40" comprises a sheet "42" (first porous layer) extending without

essential interruptions; and a sheet “38” (second porous layer) with a thickness of about 230  $\mu\text{m}$  that is electron conducting in the operational state that is applied to the sheet “42” on the side away from the anode support (See column 5 line 45 to column 6 line 60 and Figure 1).

However, Donelson et al does not expressly teach a first porous layer having a porosity of at most 40% and a second porous layer with an unsintered thickness of at most 100  $\mu\text{m}$ .

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
